I am hearing from many people who are asking, “What was this Full Moon in Pisces about?” One of the dominant features of the New Moon in Leo and this Full Moon, Sun in Virgo and Moon in Pisces has been the position of Mars in both configurations. Mars has a direct influence on men and all areas of war, aggression and conflict. As the old order is passing there are many struggles to keep things as they have been and the harder people try to resist change the more challenging change is for them. Men, prefer that things would stay status quo, yet many men are discovering that things cannot stay the same and flourish. There are a multitude of choices that must be considered and then made now, even though, often the outcome is still an unseen factor. We grow and we outgrow, rapidly now. The old ways are collapsing and there is nothing that can be done to bring them back. The deepest of truth, the greatest of Love and the power to create life better remains with us as we move forward, but the fear of loss, the shadows of lack and limit and the tunnel vision of the past must, of necessity, be left behind.

“Change is enevincible”. “Growth is no longer an option!”

Join us, in 2018, by signing up for the Personal Growth package. This has proven to be one of the most popular offerings that St. Germain has given. People are excited about the changes in their lives and express joyful anticipation for the future. Changes on all levels are bringing a whole new lease on life as we evolve into New Humans. This year St. Germain’s Teachings, which are a part of the Personal Growth Package, will focus on how the Virtues can actually help in creating a healthier, happier, richer life.

Fall Intensive

Our Fall Intensive is “Discover How to Find the New Human within You”. As the Revelation is moving quicker, we are all experiencing changes that both amazing and disturb us. St. Germain defines the direction that this evolution is taking us and how it is redirecting the way that the planet has functioned for lifetimes. Every aspect of life on the planet is being touched by these changes. No one can sit by and *think* about whether they will change. If we are on the planet we have agreed to make the shifts or be shifted.

The chaos of the times is a manifestation of the EGO minds confusion. When there is confusion around any situation it simply means that we are trying too hard to make something happen or trying to figure things out from a logical point of view, rather than allowing our intuition and spiritual flow to guide the process. St. Germain brings clarity and understanding

to help us move through these changes with peace and ease.

The Intensive will be held here in the beautiful foothills of the Wind River Mountains on November 9, 10 and 11. The cost is \$350 for the three-day event. We would love to have you join us and experience the amazing energy of St. Germain in the powerful essence of the Lander Valley.

For information on accommodations, travel and other things of importance call or email Molly at 307 335-8113 or mollyrowland22@gmail.com.

CDs and mp3s will be available.

The September group is “The EGO Mind is a Double Agent”. The EGO mind is like a two-headed serpent that is always at war with itself. One head is “right” and the other head is “wrong” and if we are prone to listen to the logical mind we can never be completely satisfied with anything that we do. The EGO will make you THINK that a certain choice or a certain path is correct and as soon as the decision is made the EGO arrives to question every part of why you would choose that way and make suggestions to look at it this way or that way, but always with a critical judgment that implies doubt. If we listen to the logical mind we can never be completely satisfied with anything that we do. The EGO will make you THINK that a certain choice or a certain path is correct and as soon as the decision is made the EGO arrives to question every part of why you would choose that way and make suggestions to look at it this way or that way, but always with a critical judgment that implies doubt.

Examining different ways of doing things brings a broader perspective and greater flexibility, but the EGO uses failure as a weapon and too many choices as a danger to the “right” choice. Humanity is at a cross roads and each person, must get comfortable with faith and trust as strong allies in moving through these challenging times. The group will be on Sunday September 16, at 2 pm MT.

“The Virtue of Purity is Grounded in Life” is St. Germain’s message for September. The Teachings blend Spiritual aspects and the daily affairs of life so that people everywhere can begin to recognize that life is not at all separate from the realms of higher awareness. Purity has been interpreted, quite often, as something that is too good to be true. However, as the paradigms are shifting purity brings a whole new feeling of mental, emotional and physical cleanliness at much deeper levels within. As all of the old decay of past is transformed into new energy all of humanity can begin to feel better about who they are and where things are going. Pure thought is well considered, rather than “holier than thou”. The desire of the Masters who are assisting the earth in its evolution is to make each being aware of the potential that the virtues hold for the new becoming.

The call-in for the Teaching is on the second Wednesday evening of each month at 7 pm MT.

Our call-ins for the Q&A are on the fourth Wednesday evening each month at 7 pm MST.

The call-ins allow you to join in to hear the teaching and ask questions at the Q&A.

If you haven’t had the experience of the Teachings that St. Germain is offering this year they really help us to understand what is going on. It just might be worth your while to check them out. The deep healing power of the Master is there to experience again and again as you listen to the awesome wisdom that he brings. CDs are \$15 for each set—Teachings or Q&A. It is \$15 to call in one time or \$30 for both sessions each month. Postage and handling are separate.

ASTROLOGY

VIRGO NEW MOON – September 9

This New Moon in the Earth sign of Virgo reminds us that our body and mind are interdependent and not two separate parts that have little if anything to do with each other. If the body congested by inappropriate foods or substance abuse the mind will be directly affected. If we experience a sense of being unwell, then every aspect of our life can be influenced. Love and wisdom have been relegated to the mental realms

and spiritual aspects have been given to the emotional realms. The Soul’s place of communication is through the solar plexus which joins the energy and power of heart and Soul and brings the essence of the Divine into both physical and spiritual realms. Virgo is associated with healing and under the auspicious aspects of the Goddess of health both physical and mental/emotional we can find answers to the issues that life is bringing us now.

Necessities for personal, as well as, outer world changes can be come much clearer under this New Moon. There will be a greater sense of balance and the ability to spot excesses can be easier in the clear eye of Virgo’s attentiveness to detail. The Sun/Moon conjunction sits opposite Neptune, which emphasizes chemical and fluid balance in the body. Where is energy of Jupiter points to sweeping changes, the attention to the small things that can be easily overlooked is Virgo’s department. The mind can go to excess when it comes to being healthy. It isn’t just eating healthy foods, but paying attention to how much is eaten and also attending to how the body responds to the food, such as beans. They can be a healthy source of protein, but if they are not properly prepared and eaten in appropriate quantity they can cause more harm than good, especially in physical discomfort. Water is a must for good health and here again the necessity to drink pure water in an amount that wise is a must. Drinking too much water can wash necessary nutrients and minerals out of the system, which can lead to chemical imbalances in the body. Pluto is sextile Neptune and trine this New Moon, which can lead to discoveries about fluid imbalances that can lead to weight gain and bodily discomfort. This configuration can also lead to new clarity about emotional issues that have contributed to health challenges.

Since, Virgo is a sign that puts the focus on well-being, spending time by the water, taking leisurely baths, walks for pleasure, rather than driving oneself to push and miss the esthetic joy of being in nature. Engaging in pursuits that can help to heal the wounds of the past, as well as, clearing the cobwebs away so that moving forward is easier and more fulfilling.

Jupiter in Scorpio is sextile, both the New Moon and Pluto which can, potentially, bring challenges that become opportunities. Since things, in these times are rarely what they appear to be on the surface, do not overlook the golden opportunity in what seems to be a disaster. The revelations that are emerging now can bring food for thought and new portals of awakening as life unfolds.

When it seems that life is repeating itself, it is time to review past choices and actions to find patterns that would best be released or redirected now. Duplicating the past does not let us see beyond old situations. Forward motion bring enlightenment, where moving through life looking over your shoulder can lead to missteps. Tendencies to avoid or overreact can be both into the spotlight of revelation so that those limitations can be transformed into useable energies. As we learn just how much wisdom and information we have within us, we can be more aware of how the opinions of others distract us from our own truth. Learning that just because someone has a strong opinion, does not mean it is the best idea. Trust is a word that associated with both Virgo and Pisces.

Old negative situations that have been hanging fire, can be completed under the watchful eye of Virgo. Where blame has been, let there be clarity and then surrender the irritations of what was. Pluto can be very effective in cleaning out and clearing the inner spaces so that new thoughts, perspectives and ways of going into the future have room to develop. This is a great time to clean out closets, drawers, garages and any place that has been cluttered due to neglect. The physical demonstration empowers clearing on the mental and emotional levels also. When life moves into stasis then there is an imperative to make room for flow.

FALL EQUINOX - SUN MOVES INTO LIBRA - SEPTEMBER 22

The Autumnal Equinox brings on the time of harvesting what has been planted during the year or in previous times. A Sun/Mercury conjunction in Libra opposes Chiron in Aries and forms a trine with Mars conjunct the South Node in Aquarius. The opportunities of the fire and air aspects to cleanse, clarify and inspire new desires and the considerations of what can be set aside during the fallow time of winter to be brought to fruition in the warmth of springs awakening.

What are you gathering that this year has grown for you. How will it nourish and nurture you during the resting time of year? Even though things of the world continue to be active there is a slowing down of the desire to be active and times of contemplation are provided during the winter cold.

In the southern hemisphere things are warming up to new discoveries can turn up as life comes out of the quiet time and into spring.

SIRIUS SETS -SEPTEMBER 23

Just before the Full Moon energies move into place, Sirius, the Dog Star, sets taking its visibility in the summer sky back below the horizon. This is the second most powerful day of the year and once we enter the autumn time of the year things begin to ease off and wind down as we move toward winter. This is a time of gathering and storing. If there are things that you have been putting off, necessities that must be in place before the weather of winter sets in this is the time to finish up. This is not only about gathering things, but obtaining information and knowledge in order to complete plans or projects that have been waiting for some bit of info to be finished.

ARIES FULL MOON - SEPTEMBER 24-25

The Aries Full Moon is conjunct Chiron (the wounded healer), which heralds the increase and continuation of the great changes that humanity is experiencing. The desire to have life move along in familiar patterns is being disrupted by the changes that are inspired in the heavens, as well as, the Cosmic shifts that are moving the frequencies of the planet higher. Revelation is a healer, because it is bringing up the things that have been avoided or put behind us so that we could believe that we were done with them. When we are confronted with what must be healed, again and again, first we see it others more and more and then we begin to realize that we are looking in mirrors that require attention. The world is crying out for love and attention, without understanding that we must love and attend to ourselves before we can allow the love to show us the best of who we are. The frustration of Aries impatience is very obvious all over the world and the leaders of the world are being confronted with the necessity to be strong, clear and compassionate when many of them have no idea how to find those things in themselves.

The asteroid Ceres is conjunct the Sun-Mercury in Libra. In Mythology Ceres represents the unconditionally loving, compassionate mother offering comfort and the uncaring, angry, non-nurturing mother. What she gave or withheld could feed not only the body, but the soul and spirit. This Aries Moon prompts us to discover the difference between

desire and need. Our desires can further us if they are not obsessive, while needs push the EGO into childish reactions. This Full Moon calls us to find a balance in our alliances with others and supporting ourselves. Inter-dependence is being clear about who you so that you can trust yourself well enough to trust others. There are two kinds of anger; one is the anger that erupts and blows up to destruction. The second kind of anger comes to center and allows the energy to promote progress, rather than ending the life. We are being called to find the balance between the *me, me, me of Aries* and the us/we of Libra. Mercury at this Full Moon is *via combusta* the Sun, which means that it is within four degrees of Sun. This can make for volatile reactions because the fire of the Sun can blind reason.

The square of this Full Moon to Saturn and Vesta in Capricorn brings some stability to the explosive tendencies of this Full Moon's effects. The motto for this aspect can be "discretion is the better part of valor." Vesta is the eternal living hearth flame. Discipline and centeredness are her virtues, her tools and aims.

Saturn represents an older person, someone who lends stability, a mentor, an elder, a wise teacher who can shed some light in the shadows of these times. This Full moon can bring dreams and revelations of wisdom that may not have been discovered before now.

Saturn is linked with time and Vesta with heart-opening love. A reminder that "It is never too late to live the life you came to live." Make wise choices NOW.

QUOTES FOR THE MONTH from St. Germain

"The way is open and the inner call is clear. The physical eye may not see, yet the path is before you. Step out in faith and allow your Soul to be your guide as you accept that you are More. Live your life rather than waiting for a plan to develop. There is creation, treasure and love waiting in the unseen." – St. Germain

"Your Spirit sings its song of peace and Love. The unfolding future awaits you. Take the next step forward, the one that you feel you cannot take, and before lies a vista of such magick and wonder. The realms of within hold the beauty that the world often hides. Find your Eden within". – St. Germain

"Let beauty NOW be what we create. The sky is not the limit. There are oceans, Suns, Moons, stars and Universes at your finger-tips. The best is yet to be. The impossible is becoming possible." – St. Germain

Look out and you may see what doubt and fear have created. Look within and in the clear, reflective pool of your own Soul you find the truth and wisdom that has been yours since the beginning. In that place of wonder you may see what awaits you as you remember to Love and trust. –St. Germain

The unmeasured essence of the Divine remains when the ashes of conflict have blown away. – St. Germain

ST. GERMAIN'S MESSAGE

Dearly Beloved Masters,

Humans are the most amazing beings. For eons humanity has been led to belief that they are alone in the Universe and an after thought of GOD. Over time Religion has both claimed that humanity is close to GOD and also that GOD abandoned humanity at some point. People have been led to believe that they are divine and evil. In the confusion of opposites there have developed oppositions in every area of life. The

emotional/spiritual part of humanity has embraced religious standards. When science emerged, it began to fill in some blanks that religions glossed over by saying “take it on faith”. Religions felt that they had to fight for supremacy and holy wars came about with the admonishment from the church, that God wanted war. The loyalty of human nature rose up to “defend and protect” the church for GOD. Science and church could not seem to find a common ground so politics set apart church and state. The state takes care of worldly affairs and the church could deal with “the things unseen”. Rather than seeking to find a point of blending, each side stands, arms folded, unrelenting in being right. The fight is old, tired and exhausting.

There are two geometric forms that are unbreakable unless you use tools or even hands to break them—the triangle and the circle. In every situation where there are sides taken there is always a third point that can bring harmony. That third point, by what ever name you call it is Love. The center that lies just below the heart in the solar plexus is the area where each person, if they are willing, can and does feel Love. Religion and science argue constantly over the origins of life. Science says that there is nothing mystical and if you cannot prove that something exists, then it doesn't. Hence with, GOD does not exist. Religion says there are mystical things, but especially in modern times, there must be scientific proof of miracles or the recognition of the miraculous must be acknowledged by the hierarchy of the church. The average person cannot be privy to the knowledge, wisdom or truth of GOD unless the church says so. Many religions simply say that people can talk to GOD (prayer), but if GOD answers then there is a question of validity.

In Dan Brown's book “Origin” the main character, Edmond Kierch, who is an atheist, computer genius and seeker of answers to the two great questions that humanity asks “Where did we come from?” and “Where are we going?” discovers that computers would take him to the moment just after creation potentially began, but would never go to the exact moment when everything started. Though the idea was to prove that GOD did not exist and was not necessary to creation at each beginning point there always remained the question, “what set the energy in motion that began what is pointed out to be ‘prime creation’?” “. The finite mind wants solid answers, proof of what has been discovered. Spirit brings the essence of the mystical that is much more intuitive and feeling based. Edmond Kierch's great revelation was that in a very short period of time machine's will take over humanity. The suggestion was that if people could learn to work with the machines, then maybe, just

maybe, humanity might survive. From time to time I have mentioned that “a human being is the most amazing machine, divinely made to never age or die”. The finite mind will either take things completely literally or believe that what is said is an analogy. There is a belief that, at this time on Earth, technology is gaining on human affairs. Without the intuitive consciousness of all that is occurring it would appear that this postulation is correct. However, the mind has always pushed to do things quickly and therefore faster has been considered better. In actuality, when there is a personal willingness to feel within and find that center point in the solar plexus, that I mentioned earlier, the connection to a sea of wisdom and a realm of mysteries exists within. There is a powerful flow of energy that causes the recognition of self-worth that has been disdained, denied or disregarded for eons of time. Recently a scientist said to television viewers, that if the existence of something they had tested was real they could have measured it with machines in a laboratory. Divine essence is such a high frequency that the mind has not yet reached a place where it could conceive of such refinement. Intuition might be measured, but there would still be the question “What are we measuring?”

We keep suggesting that if there is the willingness to stop pushing to get what is believed to be unavailable in the moment, take a deep breath and call the energy of the missing idea, concept or thing to self, there is a shift of consciousness that occurs that begins a new flow of energy to allow the acceptance of things that have been considered unreachable or unachievable. Revelation is bringing in higher frequencies, higher consciousness and higher capabilities for all of humanity. “The carrot in front of the donkey's nose” in Brown's book is still the commercial potential of making more money so that there can be greater equality. As long as a small segment of society thinks that it has the right to decide what everyone “needs” there will always be the feeling of limitation because each person has their own desires, dreams and free will. If that is not honored wars will continue to be fought. When each being begins to realize that the greatest gifts of the Divine are accessed internally, the control games of the illusion will begin to fall apart. It is not and never has been necessary to stop others from being who they are, but if each person could be encouraged from the womb to be all that they can be, life on the planet would benefit immensely. Success is held out before humanity like the rope that can pull one out of quick sand, yet there are so many threats and qualifiers that suggest that if one would take the rope, potentially all they would do is hang themselves. So, as with so much of what humanity is offered there

is the free will to choose to expand or remain in the “safety” of stagnation. An attempt to be perfect leads to less and less growth until, stasis begins.

What We are suggesting is that each person carries the SECRET within them, but the fear of the unknown prevents them from seeking within. Instead they seek outside and believe that “everyone else” knows the answer, but will not share it. Because of the uniqueness of each individual the same answer does not apply or inspire everyone. Rather than fighting over who is right, there can be the willingness to listen and hear what others have to say with two things in mind:

One-Just because someone else, even if they say they are an authority, says something it may not help or inform all people in this moment or ever. Giving ones power away to those who claim to have all of the answers still remains a power give away. When there is the question “Who can I trust?”, trust self first. If there is confusion, remember that the EGO has created chaos and confusion in order to stay in control for eons.

Two-When someone else tells you what to do, there is still the necessity to feel into self and discover beyond the finite minds limits, “Does this answer or solution lead me to a better life, not just today, but in the future NOWS?” Discernment is an inner gift.

To consider what Edmond Kierch felt that he had discovered, there was a near absence of the mention of Love and cooperation, both of which the finite mind fears dramatically and apparently still remain an unknown quantity.

In Revelation, the world is being called to look for the answers that wait inside of self, that place where GOD, by all of the many names, connects to the Beloved Creation and the next steps of Evolution are shared. GOD seeks the ongoing of creation, not the destruction. To discover the excellence of one’s own internal creativity and be willing to take the step of Faith, Love and self-awareness to blend with others, not to take sides, but to come up over the walls of fear and doubt that the EGO has built and seeks to maintain in the dynamics of the current global changes.

Have the courage to seek new ways of connecting, loving and blending with people all over the world. Discernment (trust the truth within) is imperative so that those who still continue to live in limit, do not hold back the ever-expanding potential for the world

to move into interdependence. Truth is not a “watered-down version of what ever it takes to sway the masses”. Truth has a resonant frequency that is a part of the internal shifts that humankind is experiencing. It strengthens self-worth and opens new worlds of consciousness within.

The opportunity that is presented by amazing authors like Dan Brown, who give the world something to look at and feel into, to question with an open mind and heart and ask within, “Is this ‘food for thought’ feeding a passion to move outside of the box, or will I sit and starve because it doesn’t make sense, yet?”

The unmeasured essence of the Divine remains when the ashes of conflict have blown away.

In the greatest of Love We are with you, more now than ever. You may feel us, but not with the limited mind or the chaotic emotions. We are a part of All That Is and so are you. There is no need for control. There is always room for allowing. I remain your humble servant, I AM the Lord St. Germain
